

MISSION STATEMENT

The Diagnostic Medical Imaging Program prepares the individual in the judicious use of ionizing radiation in both diagnostic radiographic and fluoroscopic procedures. This is accomplished by the application of knowledge in anatomy, physiology, and osteology; in the skillful positioning of the client/patient; the selection of correct technical factors; the proper handling and manipulation of radiation producing equipment; the utilization of accepted radiation protection procedures; and the processing of the image in preparation for diagnostic interpretation.

PROGRAM GOALS

The Program will:

- Graduate students as entry-level radiographers with the knowledge and skills to competently and safely perform radiographic/fluoroscopic procedures.
- Graduate students who demonstrate effective communication skills, critical thinking and problem-solving skills.
- Graduate students who demonstrate importance of life-long learning and professionalism.
- Help fulfill the healthcare community's need for ARRT certified radiographers.
