1. A carton of 2% milk has a label that boasts “38% less fat than whole milk”. What percent fat does whole milk have? (Do not be flustered. The percent after the 2 has nothing to do with the percent after 38, so ignore it and just figure think “2 is 38% less than what?”

2. You drive 10 miles. You drive half way at 20 mph and the other half at 30 mph. What was you average speed for the trip? (Please do not write 25.)

3. You drive M miles. You drive half way at 20 mph and the other half at 30 mph. What was you average speed for the trip?
